Washington, Feb. 5.—Increased trade with the Latin-American countries and decreases in exports to northern European neutrals were the features of American 1917 foreign commerce, as set forth in figures is-sued yesterday by the bureau of for-

Imports from South America increased from \$427,000,000 to \$588,000,creased from \$427,049,000 to \$588,000,000 and exports to South America increased from \$220,"00,000 to \$312, 000,000. "The refusal of the entents to join in negotiations enabled the German government to show its workmen that America, France and Engiand desire Germay, and, therefore, Germany must fight to the end.

"On the other hand, the participations of all the warring lands in the negotiations would have created such a peace sentiment among the people that it would have made impossible a renewal of the var after the long-welcomed armistice, and would have forced a negotiated, democratic peace.

"Any attempt to renew the war after negotiations would undoubtedly result in the overthrow of all the governments. That is why the entents ought shy of our invitation to join the general peace negotiations.

"At any rate, we believe if Mr. Wilson and Mr. Lloyd George really sought a quick peace through their latest formulas they should have shown it by consenting to join in general peace negotiations.

"Only by such participation could they have knocked out of the entente."

"What effect would the entrance of the entente to the negotiations at the present moment have?" I saked.

"If the allies should now announce their willingness to join in negotiations for the purpose of establishing a general, democratic peace, it would immediately call out a polossal response from Austria and Germany."

Most old people must give to the bowels some regular help, else they suffer from constipation. The condition is perfectly natural. It is just as natural as it is for old people to walk slowly. For age is never so active as youth. The muscles are less elastic. And the bowels are muscles.

So all old people need Cascarets. One might as well refuse to aid weak eyes with glasses as to neglect this gentle aid to weak bowels. The bowels must be kept active. This is important at all ages, but never so much as at fifty. On Sept. 23, 1916, the two children left their homes at Cowiehan Lake for the purpose of catching their ponies, and when about half a mille from home they were attacked by the cougar.
